Telomeres (chromosome)

Telomerization
The reaction, under polymerization conditions, of a molecule YZ (telogen), with more than one molecule of a polymerizable compound (taxogen), which has ethylenic unsaturation, to form products called telomers, is indexed here. The telomers have the formula $Y(A)_nZ$, wherein $(A)_n$ is a divalent radical formed by chemical union of n monomeric units of the taxogen

Telomers
See *Telomers (polymers)*

Telomers (polymers)
Addition polymers, usually of low molecular weight, of an ethylenically unsaturated monomer (taxogen) formed in the presence of a chain-transfer agent (telogen) which provides end groups for both ends of the chain, are indexed here
